Home office 3CX setup for nurses

Keep your patient calls clear and reliable with these simple steps.

Internet connection tips

- → Wired is Best (Ethernet Cable)
- → Plug directly into your router (look for the "LAN" port).
- → Why? No Wi-Fi dropouts, better call quality.

Using Wi-Fi? Follow these rules:

Stay in the same room as your router. Avoid interference from:

- **Microwaves**
- **Bluetooth devices**
- **Cordless phones**

→ Restart router weekly (unplug for 30 seconds).

Bandwidth management

Pause these during calls:

- **Netflix/ YouTube**
- **Cloud backups**
- **Video calls (Zoom, Teams)**
- **Gaming**

Prioritize 3CX traffic in router settings (ask Business Works for help if needed)

Speed test

Check at speedtest.net before shifts:

Microwaves

25 Mbps download / **5** Mbps upload

Slow?

Contact your internet provider or upgrade your internet plan.

3CX mobile app setup

When Wi-Fi fails:
Switch to 4G/5G (often more stable than bad Wi-Fi).

App optimization:

Android:	iPhone:
Settings → Battery → 3CX → "Unrestricted"	Enable Background App Refresh

Updates:

Update the 3CX app monthly on your computer

Issue	First steps	Cache solutions	Next steps
Frozen UI (PC)	Refresh page	Ctrl+Shift+Del > Clear cache Ct rl+F5 hard refresh	Try incognito mode
Blank Screen (PC)	Check connection	Clear cookies+cache Add ?v=1 to URL	Test another browser
Old Version	Restart device	Clear 'All Time' cache Flush DNS	Wait 24h
Echo	Use headset	(Not cache-related)	Check mic settings
Call Drops	Move closer to router	(Not cache-related)	Try wired connecuon
No Sound	Check volume	Mobile: Clear app cache	Reinstall app

App Optimization:

Browser: Ctrl+Shift+Del → Select "Cached images/files"

Mobile: **Android:** App Settings → Storage → Clear Cache

iOS: Offload app

Quick test: Always try incognito mode first

Logging issues:

Use the 3CX issue logging spreadsheet

Internet connection tips

- → Date/Time of issue
- → Symptoms
- → Device (PC/phone)
- → Connection type (Wi-Fi/4G mobile/wired)
- → speedtest.net result during issue

Workspace setup

Use a headset with mic

(better than phone speakers)

Close unused apps/tabs

(slows down calls).

Avoid VPNs

(can cause choppy audio).

Maintenance checklist

Weekly:

Restart router + computer

Monthly:

Update 3CX app

Emergency backup plan

4G/5G mobile or mobile hotspot: Test beforehand
